Identification of the applicant	
Name of the organisation	Szódliget Nagyközség Önkormányzata
Registered address (street, city, country)	2133 Szódliget, Szent István u. 34-36.
Telephone / Fax	36 27 590 095
Website of the organisation	http://www.szodliget.hu/
Name of the contact person	Juhász Béla
Email/Telephone of the contact person	polgarmester@szodliget.hu
Short presentation of your organisation (key activities, experience)	Szódliget is located in the Bend of the Danube, Europe's largest river. We currently have 4832 residents lakossal. We have continuously developed and improved our infrastructure. We have also been organising sports activities for the local families and we plan to boost local cultural life with outdoor events.
Description of the project	
Action, Measure in the framework of „Europe for Citizens” Programme	2.1 Town twinning
Timetable of the project	27-29 May 2018
Short description of the project, including its aims	The immigration wave has grown recently in the member states of the European Union, which is being managed differently in every country. The main goal of the project is to investigate how small towns similar to ours (in regards of location and population) could take advantage of the situation rather than seeing it as a problem. Statistical evidence shows that only 10% of the immigrants find a job immediately. The main reasons for this are the lack of language skills, work experience, and qualifications. By acquiring these skills, the level of employment could be raised to 50% in 5 years and 70% in 15 years. The main tasks and objectives of the European Union today are discussing these common issues, shortening the time frames, utilising the qualifications of the immigrants, and harmonizing the cohabitation of the local

	population and the immigrants. These are the areas where we would like to gain experience and share ours with others. This is what the European Union is about.
Role of the partner organisation in the project	Discussion of mutual problems, seeking co-operation and joint solutions. We aim to find methods of development based on a comparison of different cultures and economies.
