Description of the project	
<p>Action, Measure in the framework of „Europe for Citizens” Programme</p>	<p>Strand: 1</p> <p>Title: War prevention through criticism of media and art abuse in prewar situations</p>
<p>Timetable of the project</p>	
<p>Short description of the project, including its aims</p>	<p>Our project idea is precisely about the prevention of wars, because our museum is anti-war in character, so through this project we wish to try, together with our partners, to recognize and mark all significant characteristics and the pattern of the state in which any society or country is found when they are on the brink of war or conflict, that is, discovering what is the character of those pre-war states. This primarily refers to the creation of the general air by the media, in the sense of preparing the citizens for war.</p> <p>This is intended as the realisation of the project’s results, which can be in the form of documents as the final act of an international conference, or in the form of impressions from the project participants, which can be used in the sense of general prevention of</p>

	<p>war, i.e. the recognition of that state when one society starts sliding towards conflict and war, and when it is not too late to stop it. Project realisation should be achieved through analysis and problematizing the power of symbols, as well by analysing the abuse of art for the purpose of war propaganda, and other ways used to prepare the people for a situation when an unknown individual takes up arms and kills, or is killed, all because of generally unimportant notions for his daily life, such as national pride, country's international influence, country's flag and anthem, understanding collective uniqueness, and so on.</p>
<p>Role of the partner organisation in the project</p>	<p>Partners should address the topic in a way that is in line with their core activity and through that they contribute to drawing general conclusions on the subject. To achieve results such as an exhibition, a collection of works, a documentary movie etc, it need to be analyzed the situation before war that happened in the country from which the partner is. After the realization of the aforementioned activities, the project envisages conclusions to be compared at a joint conference organized by one of the partners.</p>
<p>Comments from the applicant</p>	<p>We believe that the contribution to the successful realization of the project can be given by all organizations that inherit and nourish antiwar values.</p>
